2-3/4" long x 3/8" high  
(Usable Print Area)

❖ Artwork submitted via Email is preferred. The operating system is Windows and vector (EPS) files are best. TIFF and other bitmapped files are acceptable if the resolution is high enough. Compress using WinZip if possible. Physical artwork should have sharp edges suitable for scanning. Call (727) 528-1000 with any questions.

❖ The Cable Clamp® design lines and curvature are unique. Therefore, the printed size of your logo/message will depend on a combination of the height vs. width. For example, less vertical height = more horizontal width.
